2 day programming class on FX Builder

FX Builder allows you to select and configure applications for the Facility Explorer field controllers.

June 28-29, 9-4pm, \$400, 8 person limit

The course is designed to familiarize students with the new Facility Explorer product line. We will cover the system architecture, software, and programming process for the new field devices. Students will be trained on the new programming environment and available logic options for these freely programmable controls. All participants will develop a basic program, use the FX simulator to test their program, and download their program into a FX field device. At the end of this course students will be able to navigate through the software and develop basic programs.

This course covers the following:

- System Architecture
- Navigation through the program
- Use of associated utilities
- Function blocks
- Assemblies (Creation & Saving)
- Build an application.
- Simulate the application in FX simulator.
- Load and test a controller.

Laptop and FX software needed (special software price \$299)
